Source: SEC EDGAR pricing term sheets (form FWP), 25 Aug 2026 to 22 Sep 2026. Terms extracted from filings with Claude (claude-haiku-4-5-20251001); all figures computed in Python from the extracted data. Commentary drafted by Claude from those figures and checked number-by-number against them. Extraction QC: 98.1% of 771 extracted values traced to source filings; 100.0% correct on a manual spot check of 122 values. LIMITATIONS: covers SEC-registered deals only, so excludes 144A/Reg S issuance (most US high yield and many European deals); volumes are a sample, not the market. Non-USD sizes converted at Federal Reserve H.10 rates for 2026-09-18. Composite rating = middle of Moody's/S&P/Fitch; sector is a model classification. Tenor measured to par call where earlier. Automated draft for discussion; not investment advice.
